

## A Case for Huwa-San Peroxide in Chicken Drinking Water

Two North American chicken producers were experiencing issues with their flocks due to untreated drinking water.

The producers switched to water treatment systems using Huwa-San Peroxide TR-25 and saw noticeable flock health improvements.

The following data was taken from a total of eight flocks, four flocks from each producer:

### Flocks 1 & 2: Before

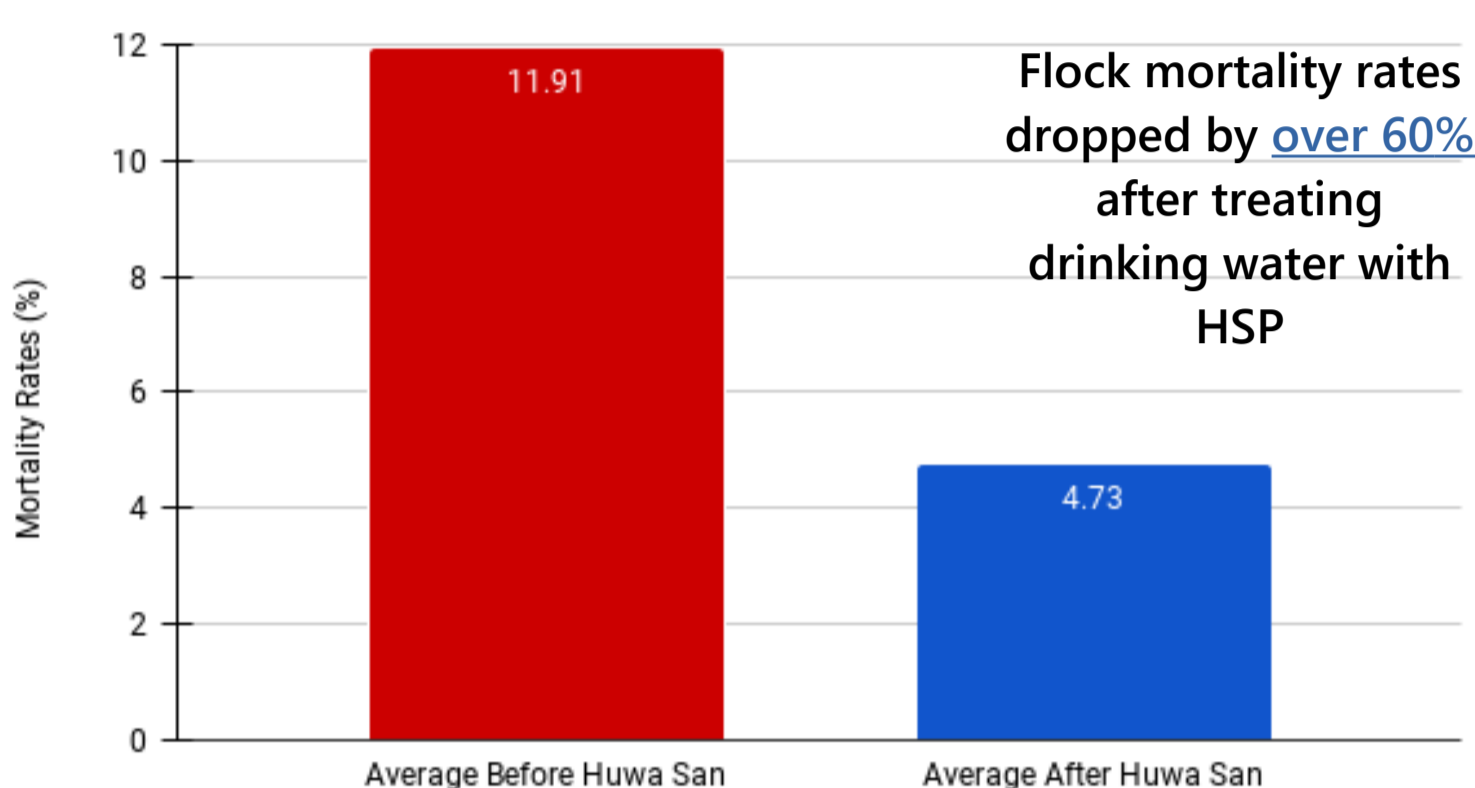

- Oct. 17, 2019 – Feb. 10, 2020
- Average 21,522 birds per flock
- Drinking water untreated

### Flocks 3 & 4: After

- Feb. 21, 2020 – Jun. 15, 2020
- Average 19,941 birds per flock
- Drinking water treated with Huwa-San 25% peroxide
