

A Case for Huwa-San Peroxide in Turkey Drinking Water

A North American turkey producer was experiencing issues with their flock due to untreated drinking water.

The producers switched to a water treatment system using Huwa-San Peroxide TR-25 and saw noticeable flock health improvements.

The following data is taken from two flocks from the same producer:

Flock 1: Before

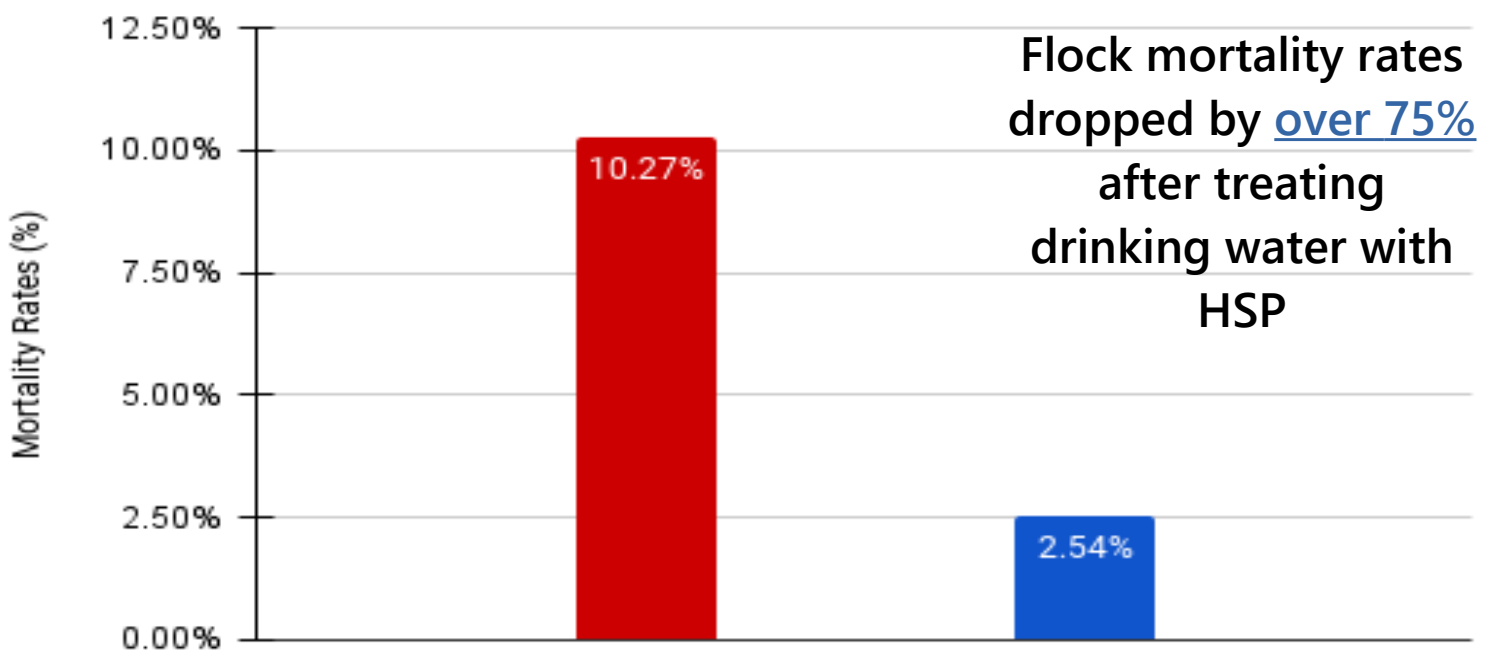

- March 4, 2021 – June 9, 2021
- 6,350 birds
- Drinking water untreated

Flock 2: After

- June 16, 2021 – Sept. 8, 2021
- 8,711 birds
- Drinking water treated with Huwa-San 25% peroxide
